Abraham-Lincoln-Straße 7, 65189 Wiesbaden, Germany

Dear Yulia Stepanenko,

I Just saw your post on LinkedIn and I know that You are looking for a React developer who can bring and realize creative ideas, that's why I'm writing this letter to get to know more about me as a prospective candidate for the position of Angular Developer at app smart GmbH. I would like to tell you about my skills, background, and ability to succeed in the position.

My motivation in the position arises from a desire to apply a broad set of programming skills to solve technological problems and build user-friendly websites and applications that can let your clients be satisfied with the product's design. My React developer training and experience, as well as my ability to play with product appearance using CSS and SASS, write technical specifications, design, develop, test, and deploy React based software applications make me an ideal candidate for the job.

I have a Software engineering degree from Higher Normal School of Technical Education Mohammedia Morocco. During my studies I had an internship as a full-stack developer where I developed a web application with reactJs .I gained a thorough understanding of the challenges involved in developing a solution to optimize the consultation process for a medical clinic. My main focus was on simplifying appointment scheduling and enhancing communication between patients and doctors. This experience helped me refine my skills in web application design and development. I also improved my information research and problem-solving abilities.I had the opportunity to apply the programming languages I've learned. Completing this project has strengthened my motivation and commitment with ReactJs.

I'm excited to try different challenges, and this is an excellent opportunity for me to contribute to building and delivering products, systems, services, and innovative IT solutions in the field of e-commerce store systems. Where I will enhance scaling, productivity, efficiency, modularity, maintainability, and the autonomy of app smart GmbH products.

Thank you for taking the time to read this. I eagerly await your response.

Sincerely,

Meriem TAHIRI
